Dan,

The 8/14 memo from Woolford/Cheatam clarifies the Administrator's email. We provided a list of sites to OSRTI on 8/14. They haven't questioned any of our work except for Kennecott, Upper Ten Mile and one other I can't recall. They haven't asked us to stop work beyond Standard Mine which we already halted. If you have specific concerns about specific sites, let's talk about them each and run them by Martin.

Bill

Subject: moratorium on field investigations at mine sites.

Administrator's halted investigations at mine sites. We have several field events in the next 6 weeks at a variety of mine sites that include water, sediment, tailings/waste rock and adit sampling. Can I assume these investigations not affected by this statement?
